Lane-AI 0.1.0 Proprietary

SEC 17684-273-411-436

5D MANIFOLD — VOLUMETRIC PROJECTION

5D $\rightarrow$ 3D embedding via non-linear projection | t, x, y, z, w | Calabi-Yau structure approximation

DIM 4/5
PCA Projection

- Color = 5th dim density
- Opacity = probability distribution

Schematical Option™ — Non-OpenAI Alternative to OpenAI's Options

The problem is extractive options masquerading as infrastructure.

OpenAI trains on your IP with no compensation. GovTech charges for utility, not visibility. AWS Lambda + OpenAI is the Bezos extractive stack. Difference is fraud.

1 OpenAI trains on your IP

No compensation, no provenance. Your kernels, your data, their dividends. Training without lease is theft.

2 Visibility billing → dividends to extractive

Google charges for visibility. GovTech charges for utility. Utility is measurable. Visibility is extraction.

3 AWS Lambda + OpenAI garbage

Bezos stack: Lambda for compute, OpenAI for IP laundering. No sovereign runtime, no sealed provenance.

KPI DASHBOARD — EXTRACTIVE DIAGNOSIS

OpenAI alternatives replaced **0 / 9**

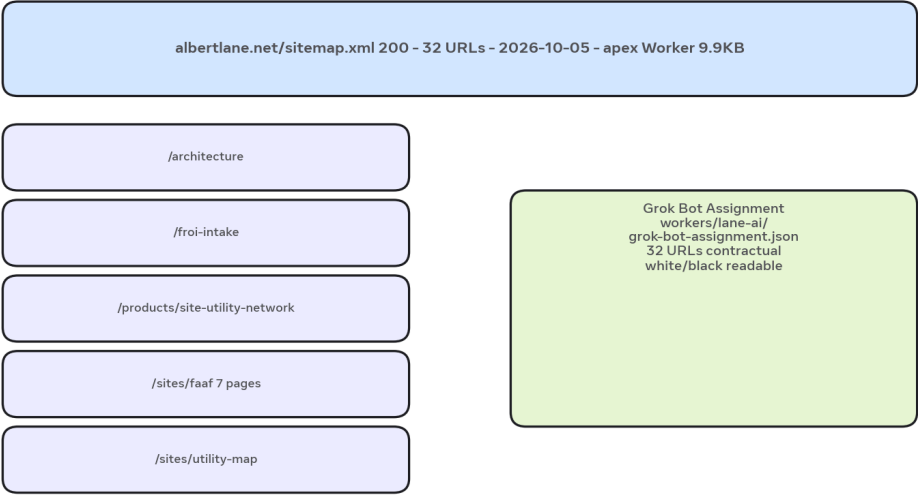

Provenance sealed **SEC 17684**

IP compensation paid **\$0 → \$104k/mo**

No Bezos No AWS No OpenAI **TRUE**
