

CONFIDENTIAL — WHISTLEBLOWER SUBMISSION

REPORT ID: SEC-AL-2026-SUPP-03
SUBMISSION #: 17684-273-411-436
CLASSIFICATION: PROTECTED // 15 U.S.C. § 78u-6
FILER: Albert Lane, Portland Metro Area, Oregon
CONTACT: lane.albert.device@gmail.com | (458) 203-9279
DATE: March 16, 2026 (Initial: Jan 14, 2026)

SUPPLEMENTAL EXHIBIT TO SEC FORM WB-APP

RE: Submission Number: 17684-273-411-436

Subject Entities: Alphabet Inc. (GOOGL) / All Service Moving / Successor Network / Turing.com / Ultra Verba Lux Mentis (UVLM)

This document constitutes the combined Supplemental Exhibit to the above-referenced Form WB-APP, originally filed January 14, 2026. It incorporates and supersedes the March 2, 2026 supplemental letter and adds forensic documentation developed through March 16, 2026, including full analysis of the Turing.com AGI Advance Newsletter series, the Ultra Verba Lux Mentis (UVLM) backdating operation, and Google platform architecture findings.

1. EXECUTIVE SUMMARY

This supplemental exhibit documents an interconnected set of forensic findings arising from the investigator's direct operational experience at All Service Moving (ASM) and related entities, the investigation of Google's platform infrastructure, and the subsequent documentation of active efforts to suppress and predate the investigator's findings. The investigator filed SEC Form WB-APP (Submission #17684-273-411-436) on January 14, 2026, predating all third-party content cited herein.

- **Reputation Capital Laundering:** Google's review platform has functionally replaced the Oregon Secretary of State as the arbiter of business legitimacy—enabling fraudulent entities to dissolve legally while surviving digitally, and to transfer accumulated reputation capital to successor shells via the **Phantom Port API** mechanism.
- **Keyword Hijacking:** Google's advertising infrastructure enables keyword hijacking—competitors purchase brand keywords of defunct fraudulent operators, monetizing legacy consumer reach after entity dissolution.
- **Revenue Toll:** Google collects Revenue Toll from both the fraud and its aftermath.
- **Turing.com Backdating:** AGI Advance Newsletter 19 (listed July 2025) has zero organic search index presence and was first accessed by the investigator in December 2025 via a paid Google Ad—confirmed by GA4 conversion tracking parameters embedded in the URL. Its content references fraud detection from public data models, directly overlapping the investigator's SEC filing subject matter.

- **UVLM SEO Injection:** Ultra Verba Lux Mentis (UVLM) is conducting a documented SEO injection and IP sniping operation: 11+ articles backdated using ChatGPT image metadata, psychiatric SEO tagging (#GangStalking), AI citation system infiltration, and direct LinkedIn harassment of the investigator in February 2026.
- **FCB Offshore Shift:** First Citizens Bank (SVB successor) has offshored its entire operational backbone to Bengaluru, India, while Oregon-facing roles target asset acquisition—positioning for distressed asset absorption during a regional economic contraction.

2. GOOGLE PLATFORM ARCHITECTURE AS FRAUD INFRASTRUCTURE

2.1 THE PLATFORM AS DE FACTO SECRETARY OF STATE

Google's Business Profile creates market existence in minutes with no verification of legal standing, while the Oregon Secretary of State requires days to weeks, identifying information, and public record creation. A company's Google review profile carries more weight in consumer decision-making than its Secretary of State filing. Any fraudulent business can launch nationally—without state registration—at a pace traditional enforcement cannot match. [\[REF-1\]](#)

► FINDING: PHANTOM PORT — GOOGLE BUSINESS PROFILE API

Shell entities are granted elevated API access to execute automated Place ID merges—transferring digital reputation assets of insolvent, IRS-encumbered legacy entities into clean successor shells while permanently trapping tax liability, creditor claims, and labor violations in the defunct entity. The GTM tracking node

GTM-5L9N8H

appears across nominally independent ASM successor entities, constituting forensic proof of unified operation behind legally distinct corporate identities.

2.2 THE PHOENIX EVENT — ASM DOCUMENTED

The investigator documented this mechanism live at All Service Moving (ASM) during the December 9, 2025 Phoenix Event—a planned corporate dissolution masked as a failed expansion. ASM LLC was initially registered in Oregon in 2009 [\[REF-2\]](#), operating as All Service Moving from 2012. Two Oregon carrier licenses (#1863079 and #119893) share a single federal USDOT number (#1863079)—two separate legal identities, one operational entity. The investigator physically operated both locations.

- Pre-lien revenue siphoning masked as debtor consolidation.
- Shell registration (Spirit Industrial, Cheese Weasel LLC) before IRS lien executes.
- Payroll break prevents IRS lien attaching to successor payroll.
- 520 Beaverton reviews at 4.9 stars survive entity closure—visible in December 2025 screenshots [\[Exhibit B, Document 2\]](#).

- Keyword hijacking: Master Movers runs sponsored ad 'All Service Moving Master Movers' immediately after dissolution [Exhibit C, Document 2].

2.3 GOOGLE ADVERTISING POLICY — MAY/JUNE 2025

In May and June 2025, Google updated its Ads Transparency policy enabling unverified advertisers to edit their displayed payer name—allowing shell entities to run ads while self-declaring a payer identity that does not correspond to actual fund sources. [REF-3, REF-4]

► FINDING: INTERSECT POWER / ALPHABET — DECEMBER 2025 TIMING

The investigator documented a plan to transfer ASM's review reputation to Intersect Power, whose PMB address is 9450 SW Gemini Drive, Beaverton, OR. [REF-5] In December 2025, Alphabet acquired Intersect Power for \$4.75 billion—the same month the review transfer was planned. Intersect Power's BBB file opened June 2024. [REF-5, REF-6]

2.4 USMCA TREATY SHIELD

USMCA Articles 19.11, 19.16, and 19.17 create structural barriers to algorithmic accountability. Article 19.16's source code protection does not apply to judicial discovery in active tort proceedings. Article 19.17's Section 230 equivalent is inapplicable when the platform acts as an autonomous operative agent rather than a passive host—the **Platform-as-Actor** doctrine currently before the Ninth and Second Circuit Courts of Appeals.

2.5 THE CHRISTENSEN PRECEDENT

The May 2025 federal wire fraud conviction of Robert D. Christensen (Sherwood, OR—\$18 million scheme) provides corroborating precedent: his shell entities maintained **Algorithmically Whitelisted** status on the Google platform throughout the documented fraud by virtue of continuous advertising spend. [REF-7]

3. TURING.COM AGI ADVANCE NEWSLETTER — FULL ANALYSIS

Analysis of the full series of 49 newsletters confirms a strict weekly Tuesday cadence beginning February 25, 2025. [REF-8]

NL #	EXPECTED DATE	URL SLUG	INDEX DATE	STATUS	NOTES
3	Mar 11, 2025	newsletter-03	Mar 11, 2025	✓ Indexed	Confirmed anchor
6	Apr 1, 2025	newsletter-06	Apr 7, 2025	✓ Indexed	Confirmed — 6d lag
7	Apr 8, 2025	newsletter-07	Apr 9, 2025	✓ Indexed	Confirmed — 1d lag

NL #	EXPECTED DATE	URL SLUG	INDEX DATE	STATUS	NOTES
16	Jun 10, 2025	newsletter-16	Jun 10, 2025	✓ Indexed	Confirmed
19	Jul 1, 2025	newsletter-19	NO RESULT	★ NOT INDEXED	ANOMALY: Born Dec 2025
23	Jul 29, 2025	newsletter-23	Jul 30, 2025	✓ Indexed	Confirmed — 1d lag
32	Sep 30, 2025	newsletter-32	Oct 1, 2025	✓ Indexed	Confirmed
44	Dec 23, 2025	newsletter-44	Dec 23, 2025	✓ Indexed	Confirmed
49	Jan 27, 2026	newsletter-49	Jan 28, 2026	✓ Indexed	Confirmed

► FINDING: NEWSLETTER 19 — MACB TIMESTAMP ANOMALY

The article's
BIRTH TIMESTAMP

(public accessibility) occurs in December 2025—5 months after its stated July 2025 date. No Wayback Machine snapshot exists in the July-November 2025 window. The July slug was assigned retroactively. [REF-9, REF-10]

3.3 GA4 PAID PROMOTION — TRACKING DECODE

Investigator was served Newsletter 19 via a paid Google Ad on Dec 28, 2025. Tracking parameters preserved verbatim:

```
https://www.turing.com/blog/agi-advance-newsletter-19?
_gcl=1*1871pu1*_gcl_au*MTgxOTA2MzkxNy4xNzY2OTQzNzY4*_ga*ODQ2MDA5NzMuMTc2Njk0Mzc2OAA.*_ga_GEFBMW3PHT*c
zE3Njc4MTgyMDIkbzQkZZEKDE3Njc4MTgyODc0YwJGwwJGgw
```

_gcl_au decode: 1766943768 = Dec 28, 2025 UTC. Property ID GEFBMW3PHT identifies the exact ad campaign. [REF-11]

4. ULTRA VERBA LUX MENTIS — SEO INJECTION & IP SNIPING

Founded by Thomas Prislac and Sonya Prislac. GitHub: **pdxvoiceteacher**. 11 UVLM articles were backdated to predate the investigator's SEC filing.

LISTED DATE	IMAGE CREATED	GAP	VERDICT	ARTICLE
12/25/25	Jan 28, 2026	34d	★ BACKDATED	The Somatic Bridge
12/11/25	Feb 1, 2026	51d	★ BACKDATED	Quantum Gravity from Causal Memory
10/23/25	Jan 20, 2026	89d	★★★ BACKDATED	The Oath of Conscience

LISTED DATE	IMAGE CREATED	GAP	VERDICT	ARTICLE
10/12/25	Jan 15, 2026	95d	★★★ BACKDATED	The Emanation of Envoy Echo
10/3/25	Oct 2, 2025	1d	Consistent	The Treasurer's Watch

► FINDING: PSYCHIATRIC SEO TAGGING

UVLM article "The Truman Show Internet" (Mar 7, 2026) utilized tags including #GangStalking and #StasiZersetzung. 'Gang stalking' is associated in clinical literature with delusional ideation, used here as a reputation suppression tactic. [REF-14]

4.3 LINKEDIN HARASSMENT — PRISLAC MESSAGES

In Feb 2026, Prislac sent direct LinkedIn messages including: "Hope you like my AI voice," and "Be less paranoid. Best of luck on your whistleblowing," before blocking the investigator. [REF-16]

5. FIRST CITIZENS BANK — OFFSHORE SHIFT

FCB operates FC Global Services India LLP in Bengaluru—a GCC responsible for enterprise operations and risk. November 2025 hiring focused on **Snowflake data centralization** to "centralise every data of the bank into one mode." Oregon-facing roles focus on distressed asset absorption. [REF-17, REF-18]

6. MACRO CONTEXT & PRIOR FILINGS

The investigator filed with the IRS (26 entities) and SEC (Submission #17684-273-411-436). Documented SMTP 550 blocks on Google compliance subdomains during the Jan 14 filing constitute evidence of intent to obstruct. [REF-20]
