CLEARANCE ATTESTATION

This official certificate confirms that all 19 assets, microservices, and edge routing nodes across the **albertlane.net** infrastructure have successfully passed cryptographic verification and SLSA Level 3 provenance audits. The estate state has been explicitly locked against the Merkle tree root authority.

CORE SECURITY & HARDENING CONTROLS VERIFIED

- **SLSA Level 3 Provenance:** Non-falsifiable build origin and isolated hermetic compilation confirmed across all engines (Z-Axis, Phonon, AROS, Forge).
- **Cryptographic Integrity:** 100% of routes validated with zero path or hash deviations against the master Merkle anchor.
- **Perimeter Defense & Session Isolation:** Ephemeral session tokens purged; mutual TLS (mTLS) key rotation executed across all regional reverse proxies (`/app/froi`, `/app/gateway`).
- **Telemetry & Latency Diagnostics:** Sub-15ms mean edge latency verified across global Anycast PoPs with zero packet loss.
